DB60 5MP Video Doorbell

DB60 delivers 5MP live monitoring experience with a 5M sensor. The 6200mAh battery ensures the doorbell last up to 6 months. DB60 is able to capture more details with the 164° fish eye lens. It supports night vision mode for clear-as day clarity even in pitch dark. With IP65 certified, the doorbell can be used outdoors under different weather conditions. Furthermore, it is equipped with a smart night light, which can be used to notify motion detections and scare away unwelcome visitors.

Bell is an indoor wireless I ring that replaces mechanical or electronic bells. Connect to your home Wi-Fi and

connect The doorbell at home. When the guest presses the call button on the doorbell, the bell will ring to remind you.

At the same time, it can be used as IMOU DB60 doorbell repeater

5MP Resolution	4:3 Aspect Ratio	Wi-Fi Connection	Two-Way Talk	Human Detection
