

Datasheet Evido WR

- OS Ubuntu 20.04 LTS.
- Small Pre-installed Wave VMS.
- Entry level recording server in small form factor.
- 4TB surveillance HDD.
- Low power consumption reduces heat dissipation and decreases energy cost.

Product Description

The Evido WR is a compact entry level recording server for small camera installations based on a Ubuntu OS with pre-installed Hanwha Wave VMS.

The systems come by default with a 4TB surveillance HDD which allows up to 30 days of recordings from 10 2MP camera's at 20FPS and 50% motion. The low power consumption reduces heat dissipation and decreases energy cost. The Evido WR boots very fast thanks to SSD technology. Evido WR are developed for 24/7 use and offer long term availability with fixed electronic design which reflects in an easier software support model.

Please contact Teletec for additional information about the specifications, features, options, benchmarks, configurations, appliance software or any other inquiry.

Datasheet Evido WR

Specifications

Model name	Evido WR
Form factor	Desktop mini box
Chipset	Integrated SoC
CPU	Intel Pentium J4125
Memory	4GB DDR4 2400MHz
Memory type support	Non-ECC
Maximum memory capacity	-
Graphics controller	Intel UHD Graphics 600
Graphics interface	1 x HDMI (4K), 1 x VGA (Full-HD)
LAN interface	2 x 1Gb LAN
Wireless interface	-
Audio interfaces	Rear: mic in, speaker out
Communication interfaces	Rear: 2 x USB 3.0 Type-A, Side: 1 x USB 2.0
OS drive type	240GB M2 module
Storage drive(s)	1 x 4TB HDD
Storage options	1 x 3.5" HDD
Operating system	Linux Ubuntu 20.04 LTS Desktop
Management	-
Remote management	-
Noise production	<35 dB
Power input	12 VDC
Power supply	60W power adapter included
Power consumption	Average: 20W
Dimensions (WxHxD)	200mm x 66mm x 236mm
Weight	1,8Kg (minimal configuration)
Operating temperature	0°C – 40°C
